Biofeedback is the process  
of gaining greater  
awareness of many  
physiological functions  
primarily using instruments  
that provide information on  
the activity of those same  
systems, with a goal of  
being able to manipulate  
them at will. Some of the

processes that can be  
controlled include  
brainwaves, muscle tone,  
skin conductance, heart rate  
and pain perception.
